VOLUME CONTENTS

Volume 60 (1989)

PHYSIOLOGY AND BIOCHEMISTRY

The involvement of microtubules in chloroplast rotation in the *Alga mougeotia*
by B.S. Serlin and S. Ferrell (Greencastle, IN) 1–8

Phosphoglycolate phosphatase: immunological comparisons of the enzyme from the different photosynthetic groups of plants using maize polyclonal antiserum
by P. Baldy, M. Piquemal and G. Cavalie (Toulouse, France) 9–20

Elicitor induced *S*-adenosyl-L-methionine caffeoyl-CoA 3-*O*-methyltransferase from carrot cell suspension cultures
by T. Kühnl, U. Koch, W. Heller and E. Wellmann (Freiburg and Neuherberg, F.R.G) 21–25

Purification of poly(A) polymerase from mung bean hypocotyls: subunit structure, molecular properties and characterization of the reaction product
by D. Saluja, M. Mathur and R.C. Sachar (Delhi, India) 27–38

Position and pairing of fatty acids in phosphatidylglycerol from pea leaf chloroplasts and mitochondria
by A.-J. Dorne and E. Heinz (Hamburg, F.R.G) 39–46

Purification of immunogold localisation of the major oil-body membrane protein of oilseed rape
by D.J. Murphy and I. Cummins (Durham, U.K.) 47–54

Changes in fatty acid composition accompanying the deposition of triacylglycerols in developing seeds of opium poppy (*Papaver somniferum* L.)
by R. Luthra and N. Singh (Lucknow, India) 55–60

Liberation of ammonia by soybean leaf pieces induced with herbicides which inhibit photosystem II
by J.W. Newton and D.D. Tyler (Peoria, IL) 61–66

Characterization of a protein kinase from soybean seedlings. Study of the variation of calcium-regulated kinase activity during infection with the incompatible race 1 and the compatible race 3 of *Phytophthora megasperma* f. sp. *glycinea* by in vitro phosphorylation of calf thymus histone H1
by K. Feller (Freiburg, F.R.G) 67–75

CELL AND TISSUE STUDIES IN VITRO

Regeneration of plants from callus tissue of okra (*Abelmoschus esculentus*)
by M.K. Roy and B.S. Mangat (Montreal, Canada) 77–81

Regeneration of healthy plants from *Catharanthus roseus* infected with mycoplasma-like organisms through callus culture
by C. Möllers and S. Sarkar (Grünbach and Stuttgart, F.R.G) 83–89

Somaclonal chromosome variation in tetraploid alfalfa
by F. Feher, M. Hangyel Tarczy, I. Bocsa and D. Dudits (Kompolt and Szeged, Hungary) 91–99

Patterns of phenotypic and chromosome variation in plants derived from protoplast cultures of monohaploid, dihaploid and diploid genotypes and in somatic hybrids of potato
by K.S. Ramulu, P. Dijkhuis and S. Roest (Wageningen, The Netherlands) 101–110

Propagation of *Valeriana wallichii* DC., using encapsulated apical and axial shoot buds
by J. Mathur, P. Singh Ahuja, N. Lal and A.K. Mathur (Lucknow, India) 111–116

Regeneration of dry bean (*Phaseolus vulgaris* L.) via organogenesis
by P. McClean and K.F. Grafton (Fargo, ND) 117–122

GENERAL

Curvulin and *O*-methylcurvulinic acid: phytotoxic metabolites of *Drechslera indica* which causes necroses on purslane and spiny amaranth
by D. Kenfield, Y. Hallock, J. Clardy and G. Strobel (Ithaca, NY) 123–127

Cryopreservation of immature maize embryos after freeze-hardening in the ear and in vitro
by I. Devallée, J. Guillaud, M. Beckert and C. Dumas (Villeurbanne and Clermont-Ferrand, France) 129–136

Ultrastructural immunolocalization of developmental proteins in phloem cell wall regions of *Pisum sativum* L. shoot tissue
by N.S. Cohn, J.P. Mitchell and Z. Zhou (Athens, OH) 137–143

Book Reviews 145–146

Corrigendum 147

PHYSIOLOGY AND BIOCHEMISTRY

Characterization of a mutant of *Anacystis nidulans* R2 resistant to the natural herbicide, cyanobacterin
by L.T. Mallipudi and F.K. Gleason (St. Paul, MN) 149–154

Metabolism of $^{14}CO_2$ by leaves of different photosynthetic types of *Neurachne* species
by B.d. Moore and G.E. Edwards (Pullman, WA) 155–161

Purification and properties of a wheat leaf *N*-acetyl-β-D-hexosaminidase
by M.S. Barber and J.P. Ride (Birmingham, U.K.) 163–172

Purification and immunological properties of an NAD(H) dependent glutamate dehydrogenase from soybean cells (*Glycine max* L.)
by P.D. Shargool and J.C. Jain (Saskatoon, Canada) 173–179

Axial control of cotyledon expansion and chlorophyll formation in germinating lupin seeds
by S.K. Nandi, L.M.S. Palni and D.S. Letham (Canberra, Australia) 181–188

The effect of assay composition, detergent solubilization and reconstitution on red beet (*Beta vulgaris* L.) plasma membrane H^+-ATPase kinetic properties
by J.L. Giannini and D.P. Briskin (Urbana, IL) 189–193

Calcium is required for the increase of dark respiration during diurnal nitrogen fixation by *Synechococcus* RF-1
by T.-H. Chen, T.-C. Huang and T.-J. Chow (Taiwan, Republic of China) 195–198

GENETICS AND MOLECULAR BIOLOGY

Cloning of tomato nuclear ribosomal DNA. rDNA organization in leaves and suspension-cultured cells
by B. Dobrowolski, K. Glund and M. Metzlaff (Halle, G.D.R.) 199–205

Mutagenesis of pea (*Pisum sativum* L.) and the isolation of mutants for nodulation and nitrogen fixation
by G. Duc and A. Messager (Dijon and Castanet Tolosan, France) 207–213

First report of non-mycorrhizal plant mutants (Myc^-) obtained in pea (*Pisum sativum* L.) and fababean (*Vicia faba* L.)
by G. Duc, A. Trouvelot, V. Gianinazzi-Pearson and S. Gianinazzi (Dijon, France) 215–222

Transformation of callus cultures of nine plant species mediated by *Agrobacterium*
by T. Komari (Shizuoka, Japan) 223–229

CELL AND TISSUE STUDIES IN VITRO

Cytochrome *P*-450 inducer/inhibitor effects on cell cultures of *Catharanthus roseus*
by A.P. Simpson and S.L. Kelly (Sheffield, U.K.) 231–236

Enhanced protoplast division by media ultrafiltration
by P.A. Davies, P.J. Larkin and G.J. Tanner (Osmond and Canberra, Australia) 237–244

Isolation and culture of protoplasts from cell suspension cultures of *Duboisia myoporoides* with subsequent plant regeneration
by Y. Kitamura, T. Morikawa and H. Miura (Nagasaki, Japan) 245–250
A medium and simplified procedure for growing single cells from *Solanum* species
by G.J. Hunt and J.P. Helgeson (Madison, WI) 251–257
Sinapic acid stimulation of anthocyanin accumulation in carrot cell cultures
by D.K. Dougall (Knoxville, TN) 259–262
Plant regeneration from embryogenic suspension cultures of Chinese yam (*Dioscorea opposita* Thunb.)
by A. Nagasawa and J.J. Finer (Wooster, OH) 263–271

GENERAL

Flowering plant sperm cells: isolation from pollen of *Gerbera jamesonii* (Asteracae)
by D. Southworth and R.B. Knox (Ashland, OR and Melbourne, Australia) 273–277
Subject Index Volume 60 279–282
Author Index Volume 60 283–284
Contents Volume 60 285–287
